Summary

Second-year ECE undergrad at JNU building production full-stack systems across React, Flask, and Python. Comfortable across the full development lifecycle — REST API design, database modelling, frontend UI, and deployment. Hackathon finalist (6,500+ teams), active open-source contributor, and Secretary of JNU's coding club. Seeking internships to contribute to real codebases under experienced engineers.

Education

Jawaharlal Nehru University — B.Tech, Electronics & Communication Engineering Aug 2024 – May 2028
CGPA: 8.01/9.0 | Coursework: DSA, Computer Networks, Operating Systems, DBMS

Queen of Angels' Convent Higher Secondary School, Vadadla, Bharuch, Gujarat Graduated May 2024
Class XII – ISC: 94% | Class X – ICSE: 96% | Affiliated: CISCE, New Delhi

Technical Skills

Languages Java, C++, JavaScript, Python, SQL, Go
Frontend React 18, Vite, Tailwind CSS, HTML5, CSS3, Recharts, Framer Motion
Backend Flask, Node.js, REST APIs, Socket.IO, PostgreSQL, SQLAlchemy, JWT Authentication
ML / AI PyTorch, CLIP (Transformers), MediaPipe, BM25, Vector Search, Qdrant, Groq LLM
Tools Git, GitHub, Supabase, Render, Vercel, Linux

Projects

LifeLineAI — AI Health & Emergency Decision Assistant [GitHub](#) [Live](#)

React (Vite + Tailwind) • Flask • Socket.IO • MediaPipe • Groq LLM • SQLAlchemy • JWT

- Built full-stack emergency triage system: SOS video analysis + symptom questionnaire → structured severity scores and real-time first-aid guidance dispatched with live geolocation to emergency contacts via Socket.IO.
- Engineered MediaPipe CV pipeline for distress detection; integrated Groq LLM for structured JSON guidance and multi-turn incident chat; added JWT auth and full i18n across React and Flask API layer.

JanMitra — AI Civic Intelligence & Digital Democracy Platform [GitHub](#) [Live](#)

Flask • SQLAlchemy • JWT • APScheduler • Knowledge Graph • React Dashboard

- Civic-tech platform for AI-powered issue reporting, fact-checking, and policy decision support; finalist (shortlisted from 6,500+ teams) at India Innovates national hackathon.
- Flask backend aggregating 20+ government/news sources via scheduled jobs; Knowledge Graph REST APIs powering real-time dashboards with multi-role JWT auth and modular service architecture.

Multimodal Search — CLIP + Qdrant Image Retrieval Engine [GitHub](#)

PyTorch • CLIP (ViT-B/32) • Qdrant • BM25 • Flask • Python

- Text-to-image and image-to-image search using CLIP 512-d embeddings + cosine similarity in Qdrant; hybrid re-ranking (CLIP + BM25) and offline evaluation (Recall@K, MRR) with reproducible benchmarks.

Achievements & Competitive Programming

- 2nd Place** — Predictathon, IIT Ropar (Advitiya'26) | **1st Place** — Tech Trials, JNU SoE EnggQuest
- Finalist** — India Innovates National Hackathon (shortlisted from **6,500+** teams)
- CodeChef **2-Star** (Peak: 1474) | Solved **350+** DSA problems across LeetCode, CodeChef, Codeforces
- Coding Profiles: codechef.com/users/satvic | leetcode.com/u/sattvic

Leadership & Extracurricular

Secretary — Co.L.D Club (Coding & Learning Development), JNU Aug 2024 – Present

- Led beginner-to-intermediate coding workshop series for 60+ members; organised 4+ technical contests end-to-end including problem sets, logistics, and post-event documentation.
- Maintained meeting records and tracked action items; served as primary communication channel between club leadership and the student community.

Executive Member — DeRobotica & UAV/Drone Club, JNU Aug 2024 – Present

- Supported robotics and UAV workshop facilitation; assisted with hardware setup, live demos, and participant mentoring.

Certifications

- Responsive Web Design — freeCodeCamp [🔗](#)
- Algorithms, Part I — Princeton University (Coursera) [🔗](#)
